Site has the characteristics of a small concentration camp. It is situated in the mountains high above a village or small town. This compound is presently overgrown and empty. Round pens, earth-covered structures or, perhaps, pits contained prisoners. At this site, in the past, captives were killed or allowed to die, possibly en masse.

Site is rising, sloping tall land with grass and browns. Cool and bright. Also rocky land. Structures at the site are square and shaped in some way. They are beige or tan, rough in texture and gritty. They're short. The area emits "hot smells" and unpleasant flavor.

There are many structures / buildings at the site, primitive in construction. The area is primitive. The people are large, slow-moving, wear rough clothing. There is an agrarian feel to the site.

Drop of building at the base of a mountain - green with a primitive feeling.
